System Media

Users can now choose a Status and/or Category on System Media.

Status

The Status field will allow users to choose from New, Working, ASAP, and Complete. When a new System Media is created, the status will default to New. The status can be changed as needed. Choosing the Complete status will remove the media from the list. Completed items can be seen by clicking the **Show All** button at the top of the screen.

The screenshot shows a web application window titled "System Media". The interface includes a yellow header bar with the title and a user profile icon. Below the header, there are several input fields: "Date" (set to 11/06/2019), "File:" (with a browse button), "Description:" (a text area), and "Note:" (a larger text area). There are also fields for "Account:", "Filename:", "Scanner:" (set to FUJITSU), "Status:" (set to NEW), and "Category:". A red arrow points to the "Status:" dropdown menu. At the bottom, there are icons for adding, saving, and deleting, and a section for "Entered by:" (STEPHA) and a timestamp (11/06/2019 10:44:39 AM).

Scan Categories

Scan Categories is a user definable area which may be used to categorize system media. One example of when you would use this is to assign the media to a specific person or department within your office.

Scan Categories can be created by going to Code Files | Other | Scan Categories. Click  to add a new category. Enter a description for the category and click  to save, or click  to save and add another category.

The screenshot shows a web application window titled "Scan Category". It contains a single "Description:" text input field. Below the input field are three icons: a plus sign (add), a save icon (floppy disk), and a red X (delete).

Categories can then be assigned to System Media.

System Media

Date: 11/06/2019 File: ...

Description: ...

Autoposting

When autoposting secondary payments prior to the primary payment, eTHOMAS will now leave the remaining balance instead of doing a PARADJ for it.

First Visit Date

When posting charges, if the date of service is prior to the patient's First Visit Date, the First Visit Date will be updated with the new date of service.

Print EOB

The printed EOB from eTHOMAS will now report the provider's individual NPI number if there is no group NPI number.
